Controls & Methods

1. Input Fields

- Email/Username field with validation
- Password field with visibility toggle
- Remember me checkbox

2. Navigation Links

- Forgot password
- Create account

3. Security Features

- Session management
- Input sanitization
- Authentication tokens

Justification

- Minimalist design reduces cognitive load
- Essential security controls while maintaining usability
- Clear pathways for account recovery and creation
- Industry-standard authentication practices

Controls & Methods

1. Form Components

- Personal information fields
- Password creation with strength indicator
- Role selection dropdown

2. Validation System

- Real-time field validation
- Form submission handler
- Error messaging system

Justification

- Comprehensive data collection
- User-friendly validation feedback
- Secure account creation process
- Role-based access control implementation

Controls & Methods

1. Map Interface

- OpenStreetMap integration
- Interactive location picker
- Search functionality

2. Location Data

- Latitude/longitude capture
- Address verification
- Location preview

Justification

- Visual confirmation of location
- Accurate geographical data collection
- Enhanced user experience for address input
- Critical for emergency services routing

Patient Management

Upload Diagnostic Report

Controls & Methods

1. File Upload System

- Drag-and-drop interface
- File type validation
- Size limit enforcement

2. Preview Features

- Thumbnail generation
- File metadata display
- Remove/replace options

Justification

- Streamlined document submission
- Error prevention through validation
- Clear visual feedback
- Efficient file management

Inventory Control

Medicine Availability View

Controls & Methods

1. Statistics Display

- Category/Availability toggle
- Bar chart visualization
- Binary status indicators (Available/Out of Stock)

2. Data Representation

- Vertical scaling (0-1)
- Clear metrics display
- Color-coded status

Justification

- Immediate visual feedback on stock status
- Simple binary representation for quick assessment
- Essential for inventory management decisions
- Clear status visualization

Category View

Controls & Methods

1. Category Display

- OTC medication tracking

- Percentage-based visualization
- Consistent color scheme

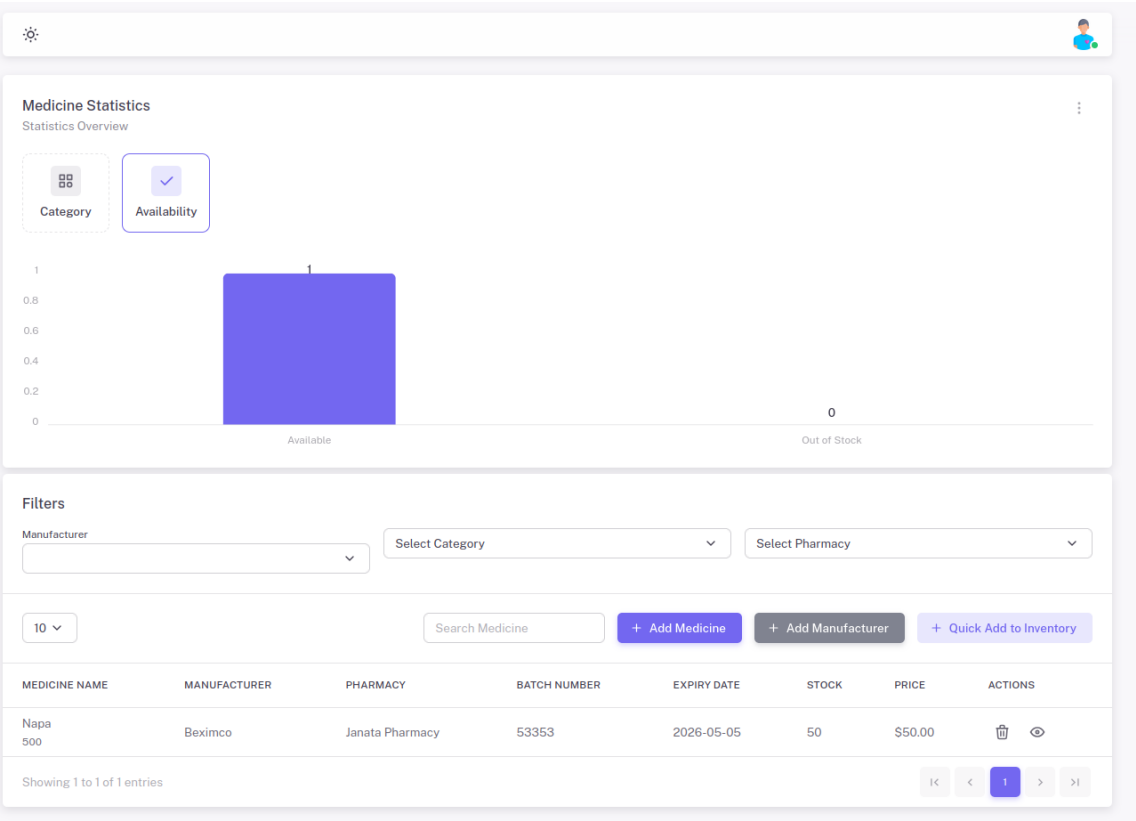

2. Navigation Controls

- View toggles
- Category filters
- Data refresh

Justification

- Category-specific monitoring
- Ratio tracking between medicine types
- Consistent user experience
- Efficient inventory categorization

Inventory Management Dashboard

Controls & Methods

1. Filtering System

- Manufacturer dropdown
- Category selector
- Pharmacy filter

2. Data Management

- Search functionality
- Pagination controls
- CRUD operations

3. Quick Actions

- Add Medicine

- Add Manufacturer
- Quick Add to Inventory

Justification

- Comprehensive inventory control
- Efficient data access and management
- Streamlined stock operations
- Complete audit trail capability

Controls & Methods

1. Input Fields

- Manufacturer name
- Country selection
- License number
- Contact details

2. Validation System

- Required field checking
- License format validation
- Duplicate checking

Justification

- Complete manufacturer documentation
- Regulatory compliance
- Streamlined data entry
- Quality control maintenance

Add Medicine

The screenshot displays a web application interface for managing medicines. On the left, a sidebar contains a 'Medicine Statistics' section with a 'Statistics Overview' chart and a 'Filters' section for 'Manufacturer' and 'Strength'. The main content area features a table of medicines. A modal form titled 'Add New Medicine' is open in the center, containing the following fields:

- Medicine Name *
- Generic Name *
- Manufacturer * (dropdown)
- Description *
- Category * (dropdown)
- Dosage Form * (dropdown)
- Strength * (text input with placeholder 'e.g., 500mg, 1g, etc.')

The modal has 'Cancel' and 'Add Medicine' buttons at the bottom. The background table shows one entry for 'Napa 500' with details like 'Beximco', 'Janata Pharmacy', '53353', '2026-05-05', '50', '\$50.00', and 'Out of Stock'.

Controls & Methods

1. Medicine Details

- Name and generic name
- Manufacturer selection
- Category assignment
- Dosage information

2. Form Controls

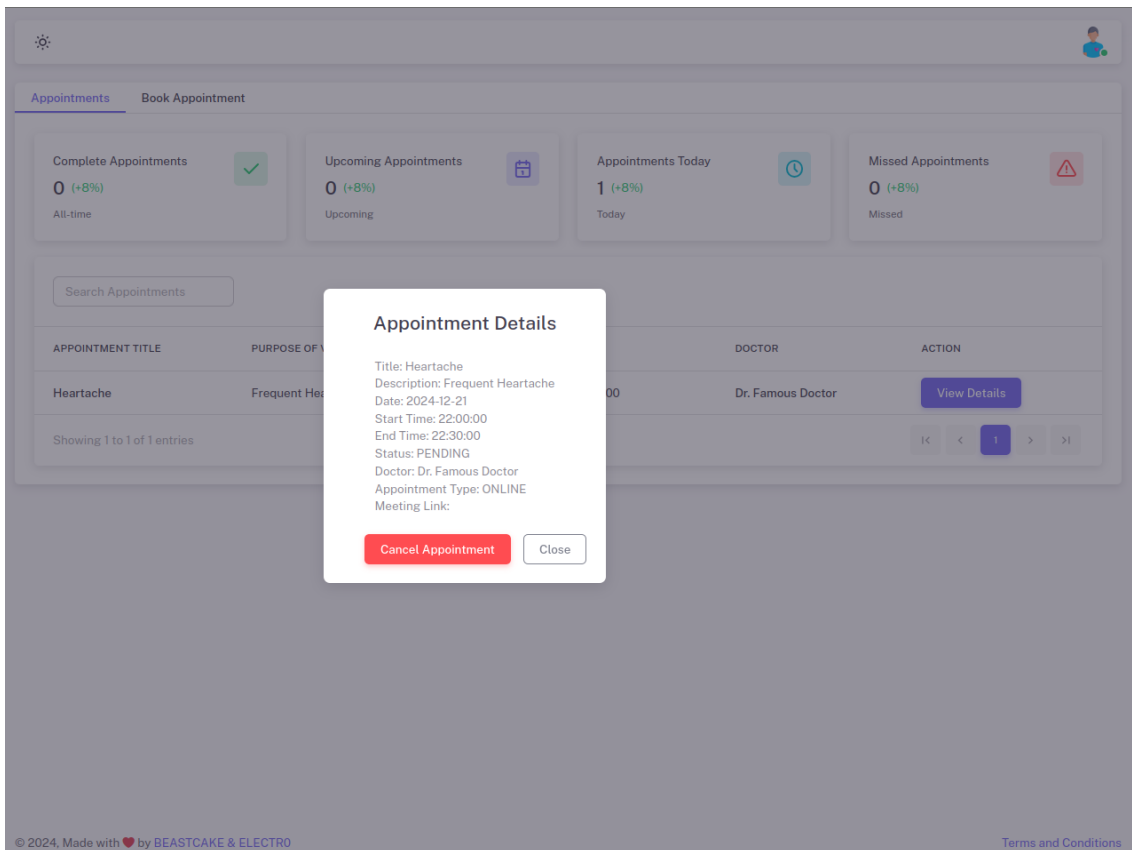

- Dropdown selections
- Validation rules
- Required field indicators

Justification

- Standardized medicine documentation
- Complete pharmaceutical information
- Error prevention
- Regulatory compliance

Appointment System

Appointment Details Modal

Controls & Methods

1. Information Display

- Title and description
- Date and time slots
- Status indicator
- Appointment type (ONLINE/IN-PERSON)

2. Action Controls

- Cancel appointment
- Close modal
- Status updates

Justification

- Comprehensive appointment information
- Clear status visibility
- Easy appointment management
- Efficient workflow

Controls & Methods

1. Image Analysis

- Side-by-side comparison
- AI detection scores
- Professional review section

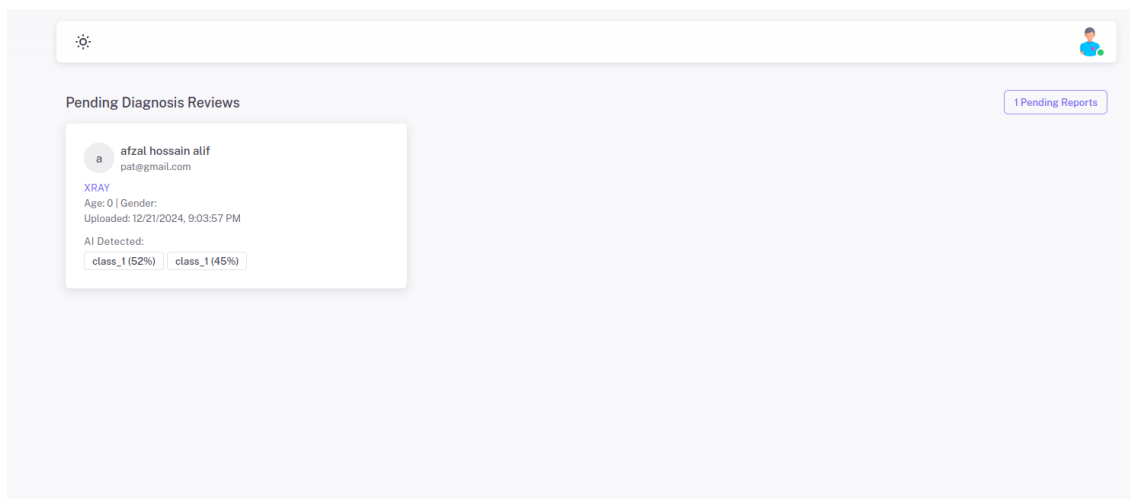

2. Report Management

- Status indicators
- Timestamp tracking
- File metadata

Justification

- Transparent AI analysis
- Professional oversight
- Complete audit trail
- Efficient review process

Pending Diagnosis Reviews

Controls & Methods

1. Review Queue

- Case list management
- Patient information display
- AI confidence scores

2. Workflow Tools

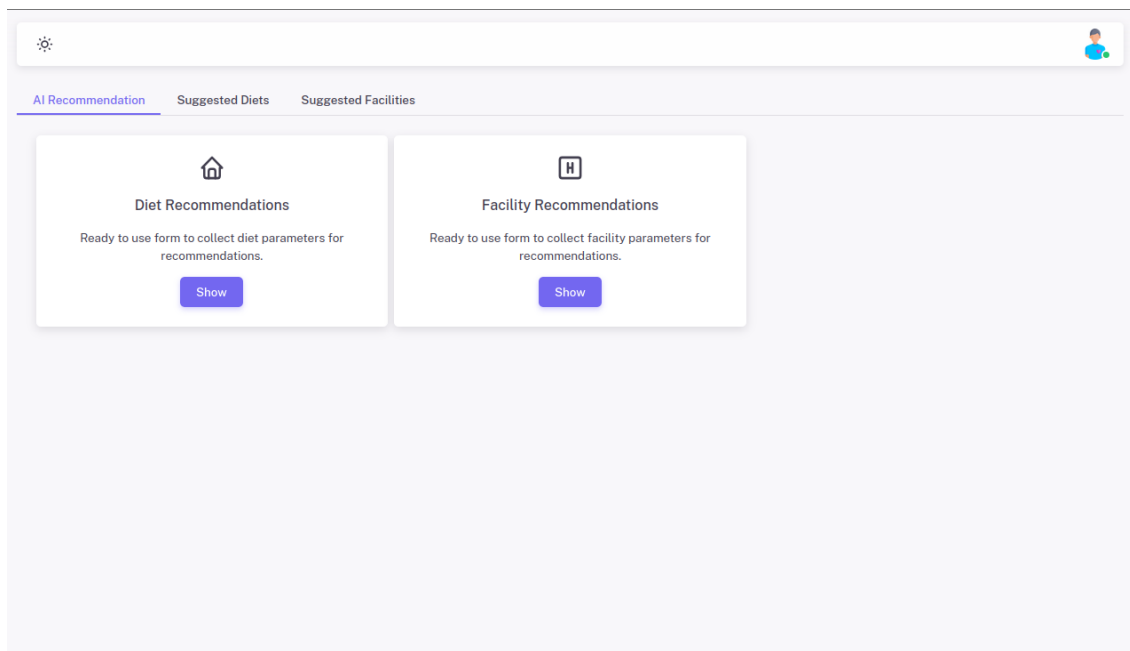

- Case categorization
- Priority sorting
- Status updates

Justification

- Efficient workflow management
- Clear case prioritization
- Comprehensive case information
- Streamlined review process

Recommendation Main Page

Controls & Methods

1. Navigation System

- Tabbed interface
- Category selection
- Action buttons

2. Content Display

- AI Recommendations
- Suggested Diets
- Suggested Facilities
- Card-based layout

Justification

- Organized recommendation categories
- Clear navigation structure
- Easy access to services
- User-friendly presentation

Diet Recommendation Form

The screenshot shows a web application interface with a dark grey background. At the top, there is a navigation bar with a settings icon on the left and a user profile icon on the right. Below the navigation bar, there are three tabs: 'AI Recommendation' (selected), 'Suggested Diets', and 'Suggested Facilities'. The main content area features two large cards. The left card, titled 'Diet Recommendations' with a house icon, contains the text 'Ready to use form to collect diet parameters for recommendations.' The right card, titled 'Facility Recommendations' with a building icon, contains the text 'Ready to use form to collect facility parameters for recommendations.' A modal dialog titled 'Diet Recommendation Parameters' is open in the center. It has a close button (X) in the top right corner. The dialog contains the following fields and controls: 'Current Weight: 75 kg' (text display), 'Weight Goal (kg)' (input field with '70' and a dropdown arrow), 'Duration (weeks)' (input field with '5' and a dropdown arrow), 'Select Goals:' (label), and three radio buttons: 'Lose Weight' (selected), 'Gain Muscle', and 'Maintain Weight'. At the bottom of the dialog are two buttons: 'Submit' (blue) and 'Cancel' (grey).

Controls & Methods

1. Parameter Input

- Current weight display
- Goal weight input
- Duration selector
- Goal toggles

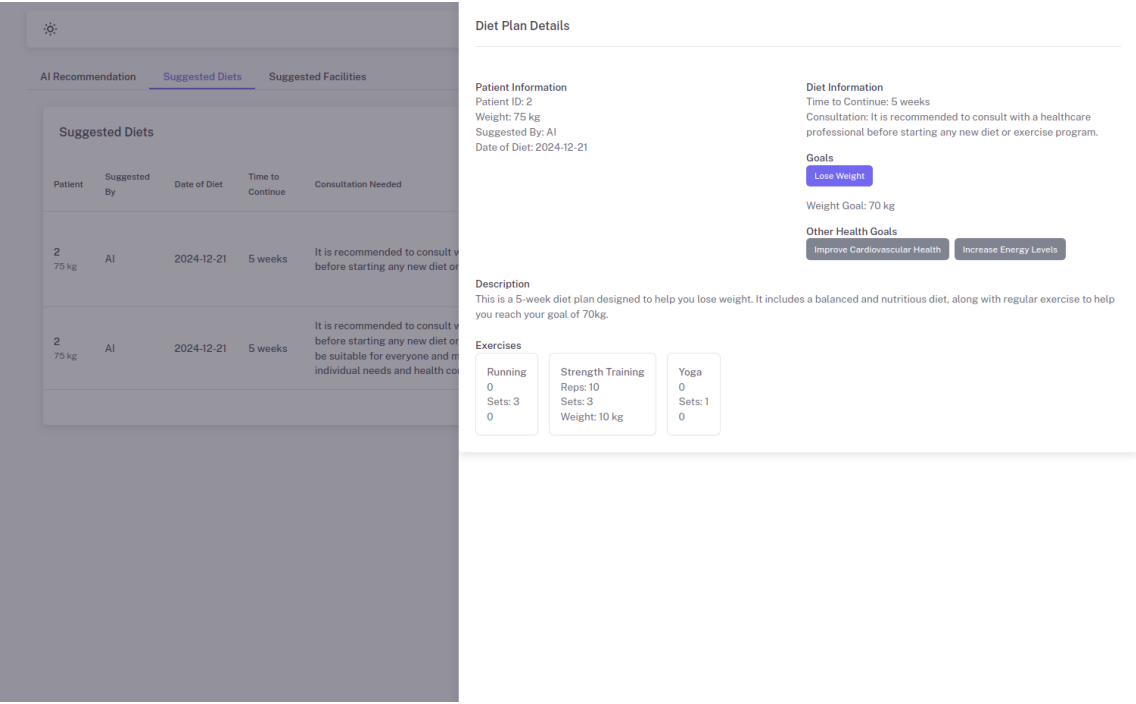

2. Form Controls

- Validation rules
- Submit/Reset buttons
- Modal dialog

Justification

- Focused data collection
- Clear goal setting
- Simple parameter selection
- Immediate feedback system

Diet Plan Details

Controls & Methods

- 1. Plan Display
 - Patient information
 - Goal section with tags
 - Exercise recommendations
 - Time-based planning
- 2. Management Tools
 - Progress tracking
 - Plan updates
 - Professional consultation

Justification

- Comprehensive plan overview
- Clear exercise guidance
- Goal tracking capability
- Professional oversight

Administrative Tools

Quick Add to Inventory

The screenshot displays a web application interface for managing medicine inventory. On the left, a 'Medicine Statistics' dashboard shows a bar chart with 'Available' (1) and 'Out of Stock' (0) counts. Below the chart are filters for Manufacturer, Category, and Pharmacy, and a table of medicine inventory. The table has columns for Medicine Name, Manufacturer, Pharmacy, Batch Number, Expiry Date, Stock, and Price. The 'Quick Add to Inventory' modal is open on the right, featuring a form with the following fields: Select Medicine (Napa (500)), Select Pharmacy (Janata Pharmacy), Batch Number, Expiry Date (mm / dd / yyyy), Quantity, Unit Price, Selling Price, and Reorder Level. The modal includes 'Add to Inventory' and 'Cancel' buttons.

Controls & Methods

1. Inventory Management

- Medicine selection
- Pharmacy assignment
- Batch tracking
- Price controls

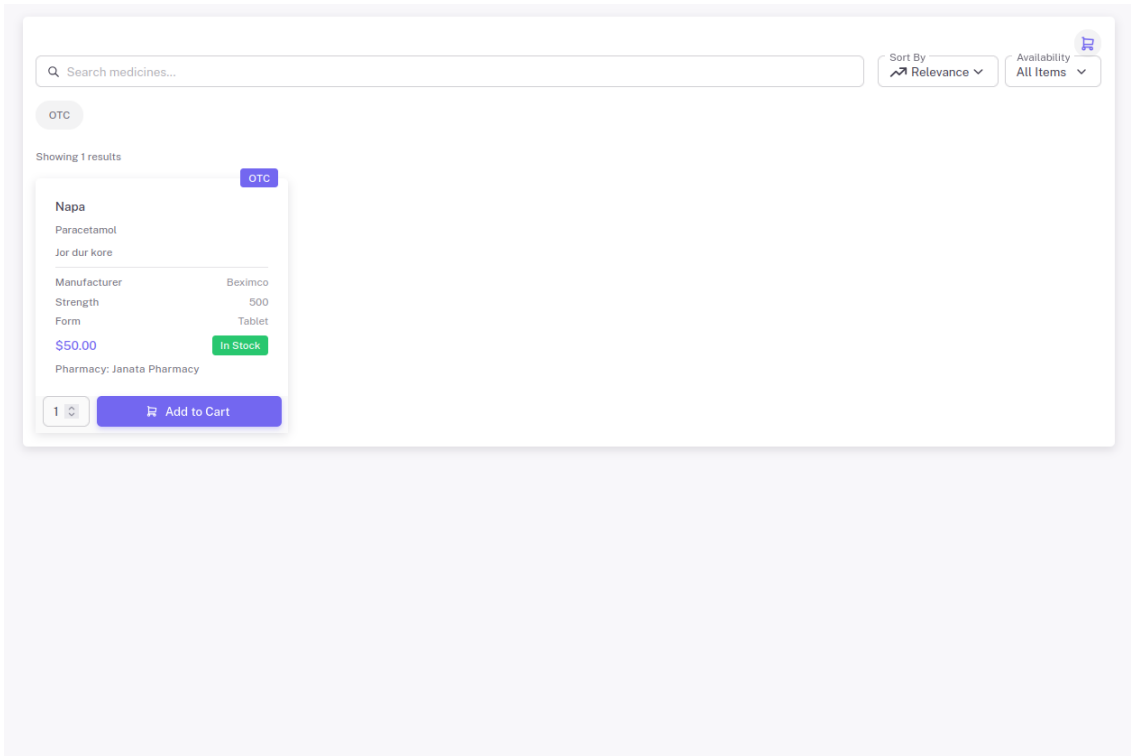

2. Stock Controls

- Quantity management
- Reorder levels
- Expiry tracking

Justification

- Efficient inventory updates
- Complete stock control
- Price management
- Quality assurance

Medicine Order Management

Controls & Methods

1. Search Interface

- Search bar
- Category filters
- Sort options

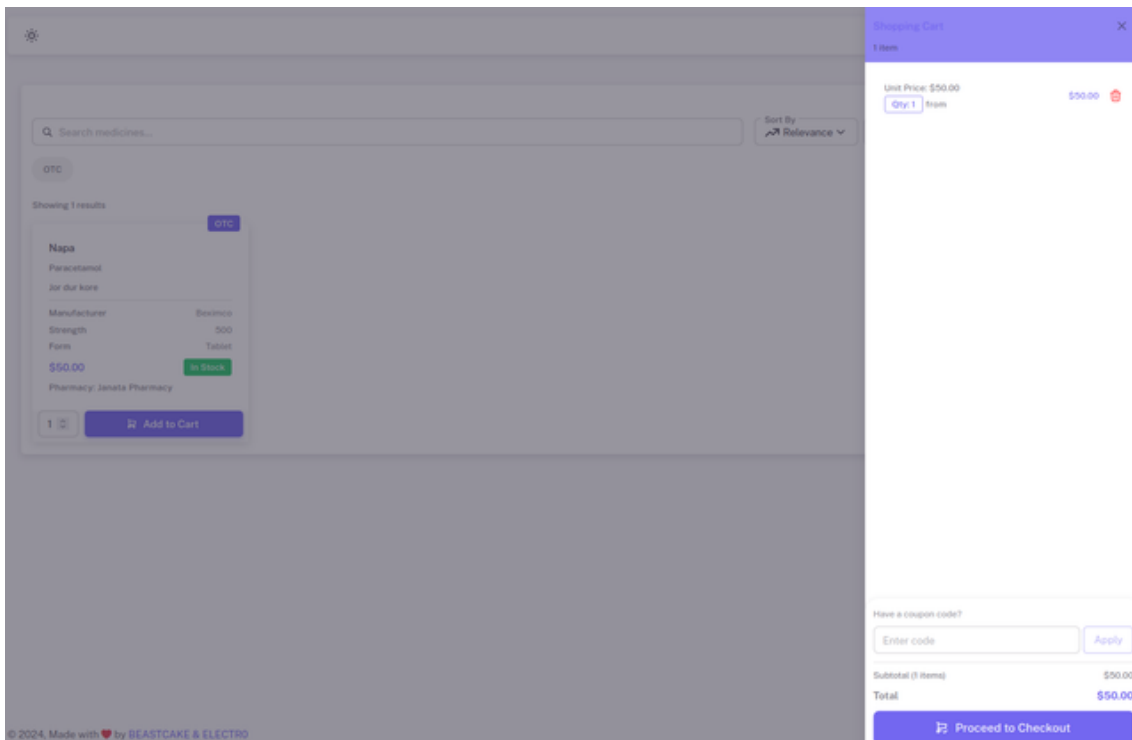

2. Product Display

- Detailed medicine cards
- Availability status
- Pricing information
- Order controls

Justification

- Easy medicine search
- Clear product information
- Simple ordering process
- Stock transparency

Shopping Cart

Controls & Methods

1. Cart Management

- Item summary
- Quantity adjusters
- Price calculation
- Promotional features

2. Checkout Process

- Clear CTAs
- Remove options
- Total calculation

Justification

- Transparent cost breakdown
- Easy quantity modification
- Promotional integration
- Streamlined checkout

Controls & Methods

1. Progress Tracking

- Step indicators
- Navigation controls
- Information review

2. Location Management

- Address input
- Map integration
- Location verification

Justification

- Clear process flow
- Accurate delivery information
- Visual location confirmation
- Simple navigation

System-Wide Technical Specifications

Responsive Design Implementation

Controls & Methods

1. Breakpoint System

- Mobile: < 768px
- Tablet: 768px - 1024px
- Desktop: > 1024px

2. Layout Adaptations

- Fluid grid system
- Flexible images
- Dynamic typography

3. Component Behavior

- Collapsible navigation
- Stacked layouts on mobile
- Touch-friendly interfaces

Justification

- Consistent experience across devices
- Optimal usability on all screen sizes
- Accessibility compliance
- Future-proof design system

Security Implementation

Controls & Methods

1. Authentication

- JWT token management
- Role-based access control
- Session timeout handling

2. Data Protection

- End-to-end encryption
- HIPAA compliance measures
- Audit logging

3. Input Validation

- XSS prevention
- SQL injection protection
- Data sanitization

Justification

- Protected patient information
- Regulatory compliance
- Secure data transmission
- Comprehensive audit trails

Performance Optimization

Controls & Methods

1. Loading Strategies

- Lazy loading for images
- Code splitting
- Caching mechanisms

2. Data Management

- Pagination implementation
- Search optimization
- Real-time updates

3. Resource Optimization

- Image compression
- Minified assets
- CDN integration

Justification

- Fast page load times
- Efficient resource usage

- Smooth user experience
- Scalable architecture

Accessibility Standards

Controls & Methods

1. **WCAG 2.1 Compliance**
 - Semantic HTML
 - ARIA labels
 - Keyboard navigation
2. **Visual Considerations**
 - Color contrast ratios
 - Font scaling
 - Focus indicators
3. **Assistive Technology**
 - Screen reader compatibility
 - Alternative text
 - Skip navigation

Justification

- Universal access
- Legal compliance
- Inclusive design
- Enhanced usability

Integration & API Documentation

External Service Integration

Controls & Methods

1. **Third-Party Services**
 - Payment gateways
 - Map services
 - SMS/Email providers
2. **API Management**
 - Rate limiting
 - Error handling
 - Version control
3. **Documentation**
 - API endpoints
 - Request/Response formats
 - Authentication methods

Justification

- Seamless service integration
- Reliable communication
- Clear implementation guide
- Maintainable codebase

Testing & Quality Assurance

Controls & Methods

1. Testing Protocols

- Unit testing
- Integration testing
- End-to-end testing

2. Quality Metrics

- Code coverage
- Performance benchmarks
- Accessibility scores

3. Monitoring

- Error tracking
- Usage analytics
- Performance monitoring

Justification

- Reliable system operation
- Quality maintenance
- Issue prevention
- Data-driven improvements
